

Campbell Swan

[swancampbell3@gmail.com] | [Glasgow, Scotland] | [Full Driver's License] | [[LinkedIn](#)] | [[Github](#)] | [[Portfolio Link](#)]

Professional Summary:

Technology orientated Software Development student with experience across software engineering, web development, cloud deployment, and data-driven Python projects. Developed practical skills in modern development tools and workflows including REST APIs, testing, containerisation, CI/CD, and responsive frontend development, while also building strong communication and stakeholder facing skills through ambassador, group projects, and leadership roles. Interested in graduate and entry level opportunities across software engineering, platform, DevOps, cloud, and wider technology teams.

Education:

BSc (Hons) Software Development | Glasgow Caledonian University | Expected Graduation: 2027

- **Predicted:** First Class Honours
- **Dissertation (In Progress, expected May 2027):** Designing a microservices architecture for calculating environmental risk in mortgage portfolios, exploring distributed systems design and ESG financial modelling. Directly relevant to regulatory compliance and risk assessment in financial services.
- **Relevant modules:** Fundamentals of Networking and Cloud Computing, Dev-ops, Group Project, Software Processes and Practise, Database Development, Programming 3, Web Application Development.

High School | 04/2017 - 08/2023

- Advanced Highers: Computer Science, Physics.
- Highers: Chemistry, Design and Manufacturing, Maths, English.

Experience:

Student Ambassador | Glasgow Caledonian University | Aug 2025 – Present:

- I'm often the first point of contact for students and visitors, providing a friendly welcome and clear directions around campus. I also offer first-line helpdesk support, answering a wide range of questions and making sure people get the information they need quickly and accurately

IEUK 2025 | Bright Network | Summer 2025 | [IEUK Task Link](#):

- Built a Python data visualisation and log analysis tool to process server logs and identify patterns including high-frequency IPs, slow responses, and suspicious activity. Implemented automated error classification and reporting. Containerised with Docker for reliable cross-platform deployment.

Scouting Youth Leader | Scouts | 2012-2023:

- Held a range of leadership roles across different sections, taking responsibility for planning and running activities. I organised and led camps, expeditions and team projects prioritising safety while helping teams work together and achieve their goals.

Professional Development:

- **JPMorgan Chase Software Engineering Job Simulation on Forage | March 2026**
- **Lloyds Banking Group Technology Engineering Job Simulation on Forage | May 2026**
- Committed to continuous professional development by attending corporate insight days and local Glasgow tech meetups, fostering a connection to the Scottish developer community and its evolving modern software practices.

Projects:

Yoga Booking Site | University Coursework | 2026 | [Live Demo](#)

- Created a full-stack yoga class booking web app as part of WAD2 coursework, enabling users to browse, book, and manage yoga sessions online. Built with Node.js, Express, and NeDB, featuring secure JWT-based authentication, role-based access control for students and organisers, and responsive templates using Mustache and CSS.
- Implemented automated testing with Jest and Supertest to ensure reliability across routes and APIs.
- Set up a CI/CD pipeline with GitHub Actions and deployed to Render, so tests and updates run automatically on every push.

Portfolio Website | Personal Project | 2025 | [Portfolio Link](#)

- Built a responsive portfolio using React, Vite, and Customised CSS to showcase my projects and experience. Set up CI/CD and deployed to Vercel so updates go live automatically. Designed the site with a mobile-first approach so it looks and works effectively on any device.

Weather ML Application | University Coursework | 2025 | [DevOps Link](#)

- Worked to develop a Python machine learning weather prediction application, containerised with Docker and orchestrated with Kubernetes for deployment on AWS EC2. Implemented automated testing and CI/CD pipeline using GitHub Actions to ensure reliable deployments. Developed as part of a DevOps group module, focusing on cloud infrastructure, container orchestration, and production deployment practices.

Skills:

- **Languages & Frameworks:** Python, Java, JavaScript, React, Tailwind CSS, SQL (MySQL), NoSQL (MongoDB, NeDB), Spring Boot.
- **Cloud & Infrastructure:** Docker, Kubernetes, AWS EC2, CI/CD (GitHub Actions), Containerisation.
- **Development Practices:** OOP, Test-Driven Development (Jest, Supertest), Agile/Scrum, Version Control (Git), REST APIs, MVC Architecture.
- **Soft Skills:** Team Leadership, Problem-Solving, Communication, Adaptability.
- **Tools:** VS Code, JetBrains IDEs, GitHub, Vercel, Render.
